SUMMARY

Results-driven .NET Full-Stack Developer with 2+ years of experience in building scalable web applications using C#, ASP.NET Core Web API, React, and SQL Server. Skilled in developing secure RESTful APIs, optimizing database performance, and delivering high-quality solutions in Agile environments.

EDUCATION

Bachelor of Computer Science July 2020 – April 2023
Annai Velankanni College of Arts & Science, Kanyakumari
Affiliated with Manonmaniam Sundaranar University

WORK EXPERIENCE

Software Developer Oct 2023 – Present
VFast Technology Pvt Ltd – Marthandam

- Designed, developed, and maintained scalable ASP.NET Core Web API applications aligned with business requirements, improving overall system performance and reducing processing time by 20%.
- Built responsive and user-friendly front-end applications using React with TypeScript, ensuring seamless integration with RESTful APIs and enhanced user experience.
- Developed and optimized SQL Server databases, including complex stored procedures, views, functions, and triggers, resulting in a 30% improvement in data retrieval performance.
- Implemented clean architecture and SOLID principles to improve code maintainability, reusability, and scalability.
- Collaborated closely with UI/UX designers, QA teams, and stakeholders to deliver high-quality features within project timelines.
- Performed API testing, debugging, and performance tuning, ensuring secure, reliable, and efficient application behavior.
- Actively participated in code reviews and deployment processes, contributing to continuous improvement and adherence to best practices.

PROJECT

AI Smart
Organization: VFast Technology Pvt Ltd – Marthandam
Tech Stack: React, ASP.NET Core Web API, SQL Server

- Developed an AI-powered project management tool enabling users to query product details using natural language.
- Implemented core modules including Assistant, Enriched Description, Capability Mapping, and User Management.
- Designed and consumed RESTful APIs for seamless front-end and back-end communication.

Attendance Management System

- Built a role-based login system (Admin, Faculty) using JWT authentication.
- Developed React components for attendance entry, filtering, and history views.
- Created reactive forms with validations to ensure accurate data entry.
- Used Entity Framework Core (Code First) and SQL Server for database operations.

Agile Experience

- Worked in Agile Scrum teams with 2-week sprint cycles. Used Jira for sprint planning, task tracking, and bug management.
- Actively participated in daily stand-ups, sprint reviews, retrospectives, and backlog grooming. Collaborated closely with developers, QA, and product managers to meet sprint goals.

TECHNICAL SKILLS:

- Backend:** C#, ASP.NET Core, Web API, Entity Framework Core
- Frontend:** React, TypeScript, HTML5, CSS3, Bootstrap
- Database:** SQL Server, Query Optimization
- Tools:** Visual Studio, VS Code, Git, Postman
- Other:** RESTful APIs, JWT Authentication, Role-Based Access Control
